ABOUT ME

After a long career in the automations and manufacturing industry as a production operator and technician I decided to pivot careers into programming as a full-stack software developer.

The combination of my technical and quantitative background along with my communication skills, developed through education and work experience over the past years, I believe would make me a great-fit in your company in today's environment.

EDUCATION

Full Stack Software Developer, Python Stream   *2021 - 2022*
